

RECORD OF
PROTECTED STRUCTURES

SCHEDULE

2

RECORD OF
PROTECTED STRUCTURES**Record of Protected Structures**

Buildings, structures and sites are listed in alphabetical order by road or street name or townland for each of the 14 Maps.

In general, the description for the list refers to the original use of the structures(s). The current use is normally indicated where considered relevant to the listing.

The Protected Structures are indicated in solid pink on the maps. This however is not intended to define the precise extent of the listed items. Where house names may have changed recently, the former name may be provided in the list.

In any case where boundary walls, gates or other such features or any building or structure are listed but not mapped, they shall be deemed to be listed. Likewise, in any case where a building or structure is mapped but not listed, it shall be deemed to be listed.

Note:

In relation to a Protected Structure or proposed Protected Structure, the meaning of the term structure includes the interior of structure, the land lying within the curtilage of the structure, any other structures lying within that curtilage and their interior, all fixtures and features which form part of the interior or exterior of that structure. The protection also extends to any features specified as being in the attendant ground
