Water Services:

Carrickmines Shanganagh River Flood Relief Scheme:

Preliminary designs and environmental assessments have been completed including an Environmental Impact Assessment Report. Approval is awaited from the OPW, the funding agency, to progress to the planning stage. Once received (likely in February 2025) the scheme will be submitted to An Bord Pleanala for a determination. Such determination is unlikely until early/mid 2026.

Deansgrange Stream Flood Alleviation Scheme:

The scheme received planning approval following a Part 8 Planning process and a referral to An Bord Plealana, in May 2023. Design work is underway on several elements and advance environmental work (otter camera surveys, invasives removal, ecological surveys etc.) in addition to preliminary archaeological excavations taking place for the flood storage area proposed for Glenavon Park.

Ongoing liaison is taking place with key stakeholders on other elements of the project namely flood walls in private property on Killiney Hill Road and Irish Rail re the proposed flood relief tunnel under the rail line.

Fernhill Park SuDS and Climate Adaption Measure:

Design work is advanced on the proposed pond in Fernhill Park which is a collaboration project with Parks. This will provide an element of Sustainable urban Drainage and also will assist with Climate Change Adaption.

River Dodder Flood Alleviation Scheme Phase 3:

This scheme is a collaborative project with Dublin City Council. The preliminary design is nearing completion, an EIAR preparation is underway, and a ground investigation has commenced. It is planned to hold a Public Consultation Day later in the year and submit the scheme to ABP following that.

Water Pollution Control Section

The misconnection surveys that were left over after the Dublin Urban Rivers Life Project were fully completed in the Wedgewood Estate in the Deansgrange Catchment.

One Septic Tank Inspection was carried out and one farm survey was completed.

Two Section 4 Licenses (under the Water Pollution Acts) to discharge to waters were processed, both for construction sites.

The first progress meeting for the Acclimatise 2 Project, which is examining pollution pressures on the Elm Park stream, took place.

Dun Laoghaire Harbour are expecting approximately 75 Cruise ships in 2025, with approximately 125,000 passengers and 50,000 crew. Planning to welcome these ships and their guests has commenced.

Naval Service

We have been advised that the Department of Defence have been instructed to commence discussions with DLRCC with a view to securing berthage for the two new inshore patrol vessels procured by the Naval Service in 2022. Some initial contact has been made and we look forward to this engagement.

Events:

Ice Rink

An Alpine Trail Ice Rink has launched in the Harbour since 1st November 2024 and ran through to 12th January. This is a new experience in terms of ice skating for Dublin and was successful despite the occasional storm.

Projects:

Harbour Masterplan

A project to create a Masterplan to guide the future development of the Harbour has been approved. Tenders for a design team were issued to a consortium led by a Danish firm, Arrow Architects was the successful tenderer. The initial Pre-Draft Public and Stakeholder Consultation was held in October 2024 with approximately 1050 submissions received from key Harbour stakeholders and the public. The consultation consultants (M-CO) have produced a Consultation Report which Elected Members were briefed on the 8th January

2025. Work is progressing next on the design / options study phase of the project, with design workshops to follow late February 2025.

National Watersports Campus

DLRCC in partnership with Irish Sailing and the Irish Underwater Council have been approved in principle for Stream 1 Grant funding for the development of a National Watersports Campus. We have responded to requests for additional information and are now finalizing the grant process and agreements with the project partners. An MOU has been signed with Irish Sailing and Diving Ireland in order to set out and agree the objectives of the project.

A scheme to apply for additional "top-up" funding was announced in July and DLRCC have been successful in securing an additional €410,952 for this important project.

We are out to tender at present for a design team to commence design and permitting for this exciting project.

Dublin Array Windfarm

The developers of the Dublin Array Windfarm (RWE) have approached the Harbour about the possibility of establishing an Operations and Maintenance Base for the windfarm. It is hoped that there might be synergies with the Ferry Terminal project.

RWE are working towards lodging a planning application for the windfarm, to include the cable route, substation and Operations and Maintenance base in Q1 2025.

Innovation Hub in the Ferry Terminal

It was agreed at the Special Council meeting held in January 2024 to bring an update on the Ferry Terminal to the March Council meeting.

Background:

The Ferry Terminal building has been vacant since 2016 generating no income for the former Harbour Company or the Council. An Estate agent was appointed in 2016 to act on behalf of both Dún Laoghaire Harbour Company and Dún Laoghaire-Rathdown County Council to seek a suitable tenant for the ferry terminal. The Estate agent ran several promotional and letting campaigns. Despite this, they were unable to find a party prepared to take on the investment risk.

Expressions of interest were sought in 2019 for the operation of the ferry terminal as a co working space in accordance with the existing planning permission to achieve the following objectives;

- Deliver a return for Dún Laoghaire Rathdown County Council
- Deliver services to the business sector and
- Provide a positive economic impact for Dún Laoghaire town

In addition to detailed business plans, applicants were required to submit additional information, including bank references and proof of funding for the first three years of the project. Amongst the required details to be included in the business plans were details in respect of the proposed rent and the level of capital investment to be made in the building.

As the harbour transferred to the Council without any funding the Council did not have any independent funds to make the required investment in the building. It was therefore essential that the successful tenderer had the financial capacity to make the required

capital investment in the building. Quarterdeck was the only applicant that had the financial capacity to make any capital investment in the building.

Members agreed to a S183 leasehold disposal of the terminal building to Quarterdeck at the Council meeting held on 13 June 2022 to operate an Innovation Hub. Quarterdeck had indicated that they expected to incur expenditure of $c \in 4m$ and began the process of seeking tenders for the necessary works after the lease became effective in July 2022. Widespread tender price inflation meant that the tenders obtained by Quarterdeck came in significantly higher than expected, resulting in a delay to the commencement of the works as Quarterdeck sought to get the project to a position where it was financially viable, based on the relatively short-term lease.

In accordance with the terms of the lease Quarterdeck were required to commence the works within 3 months, but due to the inflated tender prices and unforeseen technical challenges this did not happened. Quarterdeck sought to get the project to a position where it was financially viable, based on the relatively short-term lease. We agreed to work with Quarterdeck Innovation Ltd and give them the time to manage these increased costs in a way that would make the project viable.

In the interim the following conditions of the lease have been satisfied:

- Work was completed on fit out of Stena Line Offices in April/May 2023.
- Work commenced on the fit out of Ground Floor Offices in October 2023.
- On the 30th April 2024 the Fire Safety Certificate was granted for the building.
- Office furniture installed in Stena offices and first floor.
- Leaseholder committed to accelerate fit out in November 2024.
- Leaseholder advised initial tenants will be in situ by end of 2024
- First tenants took up occupancy in December 2024
- Car parking access and improvements to progress with fit out and occupancy
- The Food Hall and Ground floor co-working area remain under design, being part
- of Phase 2 with the fit out to commence post Stena offices and first floor completion
- External signage and façade improvements remain in design phase

The Economic Development Team continue to engage with Quarterdeck Innovation on their plans to accelerate the fit out on a phased basis and occupy the building. The Economic team will continue to engage with Quarterdeck Innovation to ensure the conditions of the lease are being adhered to, and to seek remedy to address any non-compliance. It has been acknowledged in the past that progress on the project has been significantly slower than anticipated since the lease became effective. The level of construction price inflation experienced during 2022 following the war in Ukraine was unprecedented and unforeseeable. It would have been unreasonable not to have afforded Quarterdeck Innovation sufficient time to explore options for the longer-term viability of the project. Despite the extraordinary construction price inflation and project delays Quarterdeck Innovation have again reiterated their commitment to the project. The Innovation Hub requires a significantly larger budget which Quarterdeck Innovation have said they are willing to commit to. With the initial tenants occupying the property in December 2024 this will provide an impetus for further tenants. Quarterdeck Innovation have said that although they are committed to the project, the project timelines are still subject to change as they rely on external circumstances.
